\$49.95

## **Adobe Photoshop Elements™ Class 1 (Feb. 7<sup>th</sup> 9:00 am-12:00pm)**

This 3-hour hands on session will show you how to use Adobe Photoshop Elements 7's powerful and user-friendly Organizer to manage your digital photographs, from uploading your digital photographs to your computer's hard drive, creating a searchable archive that will allow you to find any of them within seconds, to archiving them to DVDs or CDs. Session also includes an introduction to the Adobe Photoshop Elements 7 Editor.

**Note:** No experience with Adobe Photoshop Elements 7 is required; Basic knowledge of PC computers is recommended.

## **Adobe Photoshop Elements™ Class 2 (Feb. 7<sup>th</sup> 1:00 pm-4:00pm)**

Photoshop Elements™ is powerful yet affordable software. Students will receive an overview of many of the useful features this program offers. Topics include, cropping images for various purposes; basic retouching techniques; stitching panoramic photos together; removing unwanted portions of an image, an introduction to using layers, and more.

**Note:** Students should already own Photoshop Elements 5, 6, or 7 and be familiar with computer basics and digital concepts such as resolution and file formats.

## **Adobe Photoshop Elements™ Class 3 (Feb. 14<sup>th</sup> 9:00 am-12:00pm)**

This hands-on course will take Photoshop Elements users beyond the basics. Class will be part lecture and part hands-on computer lab. Students will complete several image-editing projects including; retouching imperfections in photos; creating a collage with several images; and creating a photo business card. This class is designed to help you understand more of the tools in Photoshop Elements and spark your creativity.

**Requirements:** Students should own Photoshop Elements 5, 6, or 7 and have attended Photoshop Elements Class 2 or have equivalent knowledge.

## **Adobe Photoshop Elements™ Class 4 (Feb. 14<sup>th</sup> 1:00 pm-4:00pm)**

Explore the more advanced Photoshop Elements features and learn to do more with your pictures. Learn about the power of working with layers in editing your images, managing layers, advanced photo retouching techniques, color correction, working in RAW, and more.

**Requirements:** Students should own Photoshop Elements 5, 6, or 7 and have attended Photoshop Elements Class 3 or have equivalent knowledge.
